## Certification and Notified Body Services for the Rail Industry

Products supplied to the Rail Industry must be reliable and safe. TÜV SÜD has in depth experience of rail industry requirements and offers comprehensive Certification and Notified Body services to benefit manufacturers and suppliers.

### Certification

Our Certification schemes enable manufacturers to provide a visible and powerful demonstration of their commitment to safety and assurance in the rail industry.

Where there is a safety critical application for equipment or components, third party assurance can be provided by TÜV SÜD Product Certification. The well known certification marks of the TÜV SÜD group are highly regarded symbols for safety, reliability and quality.

TÜV SÜD is also approved to perform International Rail Industry Standard (IRIS) certifications. IRIS certification is based on the ISO 9001 quality standard and complemented by specific rail industry requirements.

### Notified Body

TÜV SÜD is recognised for independently testing and certifying conformance to a wide range of international standards and regulations and holds over 100 Accreditations and Approvals.

TÜV SÜD's Notified Body services cover many EU Directives including:

- 96/48/EC (High Speed)
- 2001/16/EC (Conventional Traffic)
- 2004/108/EC (EMC)
- 2006/42/EC (Machinery)
- 2006/95/EC (Low Voltage Directive)
- 1999/5/EC (R&TTE)

Our Notified Body subsidiary, **Railcert B.V.**, independently assesses whether the Essential Requirements for interoperability of both High Speed and Conventional Traffic have been met. The assessment implements criteria specified in the Technical Specifications for Interoperability and Notified National Technical Rules.

### The Benefits of working with TÜV SÜD

TÜV SÜD is one of the world's leading certification bodies, whose global brand is widely respected. Our customers can benefit from a global network of auditors competent in the certification of products used for railway and industrial applications and from a broad range of testing and training services.
