Testing & Certification for Traffic Information Signs

TÜV Product Service can test traffic information signs to ensure their compliance with the UK Highways Agency and EU regulations and allows them to be used commercially.

A Notified Body opinion is no longer required by the Highways Agency, so manufacturers can now fulfil their legal obligations by having a third party organisation like TÜV Product Service carry out the relevant testing, product assessments and factory inspections.

TÜV Product Service can help you take all the necessary steps to meet the requirements of BS EN 12966-1:2005, including the following tests:

- **Optical Tests** – BS EN12966
- **Environmental Tests** – EN 12966, TR 2130
 - Impact - BS EN 12966-1 – Table 13
 - Vibration - BS EN 12966-1 – Table 14
 - Drop and Topple – TR 2130
 - Bump – TR 2130
 - Corrosion - BS EN 12966-1 – Table 15
 - Water Ingress - BS EN 12966-1 – Table 16 – IP55, EN 60529
 - Dust Ingress - BS EN 12966-1 – Table 17 IP55, EN 60529
 - Temperature - BS EN 12966-1 – Table 18
- **EMC Tests** – EN 50293 Emissions & Immunity
- **Safety Tests** – TR-1100

Why use TÜV Product Service?

- Knowledgeable engineers with over 15 years' experience in optical testing and the assessment of LED products.
- A worldwide reputation for technical proficiency, reliability and quality.
- A complete service using our comprehensive UKAS-accredited laboratory and offsite testing capability to gain Highways Agency Product Approval.
- Optional certification and the granting of a TÜV SÜD Product Service Octagon mark to open access to global markets.
