

Certification Requirements Status List & Worksheets for IEEE-1725 Compliance

Revision	CRD
100429	1.14

Available Date (May Use Date)	29-Apr-10
Active Date (Must Use Date)	31-Jul-10

• IEEE Std 1725 Standard for Rechargeable Batteries for Cellular Telephones is available from IEEE.
 • Program requirements for registration, recognition, & certification are set forth in CTIA Certification Program Battery Program Management Document (BPMD).
 • Specific product certification requirements are detailed in the CTIA Certification Program Certification Requirements Document (CRD).

"Available Date" is the date when an updated requirement status may be used in lieu of a previously published requirement status. Either the updated requirement or the previous requirement may be used beginning on the Available Date.

"Active Date" is date when an updated requirement shall be used in lieu of previously published requirement status. The previous requirement may not be used on or after the Active Date of an updated requirement.

Phase 2 CRSL Variables			
Variable Name	Option	Short Description	Additional Notes
Category	Onsite	Action must take place at the customer's manufacturing site.	None.
	CATL	Testing must be performed at the CATL accredited location, however reviews may be performed at an alternate location as agreed upon by the CATL and client.	None.
	Declaration	Vendor to enter statement of compliance (Yes=compliant; No=Not Compliant) in worksheet. If the vendor believes that the specific line item requirement does not apply to the project, an entry of "NA" should be entered. Generally no CATL action unless the CATL is made aware of evidence that contradicts the vendor's assessment.	Same as Phase 1 category "V". Entries of this Category do not have values for Type, CATL Action, or Alternate Method Permitted as these do not apply.
	N/A	No action to be taken by either the CATL or vendor.	Same as Phase 1 category "P". Entries of this Category do not have values for Type, CATL Action, or Alternate Method Permitted as these do not apply.
Type	Product	Requirement is specific to a product.	None.
	Site	Requirement is specific to a site or process, but not a specific product.	None.
CATL Action	Review	CATL to review existing evidence (data, analysis, etc.)	None.
	Witness	CATL to witness generation of data or observe process to independently establish compliance.	None.
	Test	CATL to execute independent test (involves manipulation of product or component samples).	Product inspections included in this category.
Alternate Method Permitted	Yes	May use an alternate <u>but equivalent</u> method to that specified in the CRD.	None.
	No	Must follow method as specified in the CRD	None.

<<< Possible Combinations >>>

All of the combinations listed at right would include the additional modifier, "Alternate Method Permitted." It was omitted here for purposes of simplicity.

Category	Type	CATL Action
N/A		
Declaration		
Onsite	Site	Witness
Onsite	Site	Review
CATL	Product	Test
CATL	Product	Review

Note: Onsite/Product/Review & Onsite/Product/Witness eliminated in March 2008 Working Group meeting.
