## Machinery Safety Compliance

**TÜV SÜD Product Service's machinery division consists of Laidler Associates and Safety Systems Technology, which offer consulting and engineering services to ensure compliance with relevant machinery safety legislation. We are the UK market leaders in machinery safety, which covers machinery safety legislation and remedial engineering. Our experience in machinery safety compliance provides you with the reassurance that your product has been independently assessed for compliance.**

Laidler Associates offers machinery safety consultancy services that cover comprehensive Machinery Risk Assessments. As part of the service we can give advice and assistance with the following:

- PUSER or the Provision & Use of Work Equipment Regulations require users of work equipment to carry out regular risk assessments which are documented and kept on file. The regulations require that all provided work equipment is suitable for its intended task and can be used without putting persons at risk. Laidler Associates can offer comprehensive machinery assessments against the requirements of the Provision of Use and Work Equipment Regulations (PUSER) as

well as a variety of training seminars on site or at a venue of your choice.

- We can offer a comprehensive CE Marking service against the requirements of the Machinery Directive which can be tailored to individual company requirements. As part of our Machinery Directive services our expert engineers can give you advice and assistance covering:
  - Comprehensive risk assessments against the needs of the Essential Health and Safety Requirements within the Machinery Directive.
  - Cross referencing risk assessments with all applicable EN Standards for presumed compliance once a control measure has been implemented.
  - Compilation of the machine's Technical Construction File.
  - Raising of a Declaration of Conformity or Declaration of Incorporation and, if required, acting as the Authorised Representative established within the European community.
  - Testing Methods and Procedures.
  - Holding the Technical Construction File for both EU and non-EU businesses.

[www.tuvps.co.uk](http://www.tuvps.co.uk)

For both PUWER and CE Marking, the following applies:

- Risk Assessments will be carried out in accordance with relevant national requirements.
- The Report will address each of the individual machines, showing conformity or highlighting non-conformities.

#### Our Benefits:

- Confidence of working with recognised experts
- Unrivalled responsiveness and capacity
- Will act as Authorised Representative and sign relevant declarations
- Unlimited free support and advice

- If there are any areas of concern or recommendations of control methods suggested, relevant Standards will be used for the correct control measure.
- The risk assessment report will be produced on the Laidler Associates Risk Management software (mCom Machinery Compliance Software). A copy of the software can also be provided along with the database.

We can also provide practical training services covering all aspects of machinery safety including CE Marking, PUWER, risk assessment and EN Standards. A 5-day, University accredited course is also available at venues around the UK.
